Work Experience

Freelancer Javascript developer – Upwork / Fiverr / Freelancer

03/2022 – 07/2023 | In

As a dedicated part-time freelancer, I engage in unique challenges presented by each client outside of my regular work hours. I have successfully delivered bespoke solutions to international clients from the UAE and USA, enhancing their online presence through website development using ReactJS and TailwindCSS. Additionally, I am skilled in translating Figma designs into fully functional Android applications utilizing React Native.

Junior Software developer – Pivotchain Solutions

09/2021 – 07/2023 | Pune, In

I spearheaded frontend development projects, achieving a 20% improvement in website loading speed through various optimization techniques. One of my standout projects is the 'House of Wisdom' in Sharjah, a cultural hub designed to emphasize interactive learning. I developed this project using ReactJS and Tailwind CSS, ensuring that the interface matches Figma designs pixel-to-pixel. This project represents one of my finest achievements in UI development.

Software Developer – Humancloud Technologies Pvt. Ltd.

08/2023 – Present | Pune, In

As the project lead, I directed a team of 5 developers in full-stack development projects, ensuring timely delivery and adherence to quality standards. I conducted thorough code reviews and implemented rigorous quality checks, which resulted in a 20% decrease in bugs and significantly enhanced overall code quality. Additionally, I spearheaded the implementation of Agile methodologies, improving project efficiency by 30% and fostering a collaborative work environment.

Projects

REMPO: Maharashtra Real Estate Platform

02/2023 – 06/2023

I created REMPO, a real estate platform designed for buying and selling plots in Maharashtra. The platform was built using the MERN stack and React Native for mobile accessibility. Additionally, I integrated Google Maps and Stripe to enhance functionality and ensure secure transactions.

BSF Marathon

09/2023 – 11/2023

I developed a Marathon App utilizing React Native and MongoDB, featuring a live location tracker. This app allows users to track their training, find races, and connect with fellow runners, serving as the ultimate running companion.

CACB

10/2023 – 12/2023

I developed the CACB platform aimed at CA professionals, enabling seamless XML file uploads for the Income Tax website with Form 15Ca and Form 15Cb. I utilized the MERN stack to build the application, integrating PhonePe as the payment gateway for efficient transactions. Additionally, I employed AWS Lambda functions to facilitate the conversion of Excel files to XML format.

Book Your Tickets

01/2024 – Present

I designed a ticket booking platform similar to Townscript and BookMyShow, utilizing Next.js and PostgreSQL, and deployed it on Google Cloud Platform (GCP). This project offers seamless ticket booking experiences, efficient event management, and secure transaction processing.

DevRev snap-ins

08/2023 – Present

I developed DevRev SnapIns (plugins) that emulate functionalities found in JIRA, Bitbucket, GitLab, MS Teams, Discord, and custom dashboards. Utilizing JavaScript for development and employing Jest for robust testing, I empowered seamless integration and enhanced functionalities for developers.

RRSR tool

02/2024 – Present

BRSR tool

02/2021 - Present

I developed a BRSR Tool that enables users to submit annual reports to the government seamlessly. Built with the MERN stack, I ensured the application is robust and scalable. This tool simplifies regulatory compliance for companies by streamlining their reporting processes.

Education

Diploma in computer engineering - JSPM's Jayawantrao Sawant Polytechnic

06/2018 - 07/2021

Awards

Rookie star

Received recognition with the Rookie Start Award from Humancloud Technologies, acknowledging outstanding performance and contributions as a newcomer to the team.
